

Revision Power Hour

Get the most out of your revision by completing a power hour. Here's how you do it.

Step 1

Choose a past paper question

Use what your teacher has given you, or use the internet or revision guides to find examples

Step 2

Revise

Spend 20 minutes revising the content you need to answer the question

Step 3

Do the question

Set a timer for the right amount of time to answer and stick to it; maximum 20 minutes

Step 4

Mark your answer

Use the mark scheme for the paper; try to think like the examiner

Step 5

Get feedback

You could ask a teacher or a friend to review your marking and suggest improvements, or you could complete a self-evaluation
